

Dear Customer.

All trackers differ in their data transfer protocol. Most trackers are configured via SMS message. The command format varies depending on the manufacturer and firmware, example: "SERVER,0,tr.gpscs.com,5064,0#".

Connection settings to our server:

Server address – tr.gpscs.com.

Port – in accordance with the data protocol used by your device.

Below is a list of known devices and the transmission protocols they use. Find the one you need among them and determine the connection port:

| Device | Protocol | Port |
|--------------------------------|------------|--------|
| Freematics ONE+ Model A | freematics | 5170 |
